Profile

My name is Nils Ekstrand, and I live in Lund. I am 24 years old and in my fifth year of the Computer Engineering program at Lund University.

As a person, I am energetic, positive, and social. I love challenges and always set goals that I strive to achieve. In my spare time, I enjoy working out, hanging out with friends, and working on various coding projects. Additionally, I am active in my section of the computer engineering program and work at the student nations in Lund as a bartender.

I was born and raised in Lund, but during four years of elementary school, my family and I lived in California, USA. Those years made me essentially bilingual.

Work Experience
