Profile

I am a 26-year-old software developer based in Lund with a strong passion for technology, problem-solving, and continuous learning. As an energetic, positive, and highly social person, I enjoy collaborating with others, building strong relationships, and working toward shared goals. I thrive in team environments where I can combine technical expertise with strong communication skills and a genuine interest in people.

Throughout my career, I have worked across the full software development lifecycle, from requirements gathering and solution design to implementation, testing, deployment, and maintenance, primarily within agile Scrum teams. I have experience collaborating closely with clients and stakeholders through planning sessions, task estimation, and customer meetings, balancing technical requirements with business needs. My technical experience spans backend, frontend, cloud, and DevOps technologies, and I am highly motivated by solving complex challenges, delivering high-quality solutions, and continuously learning new technologies to stay relevant and maintain a strong technical edge in a rapidly evolving field.

Outside of work, I am training for an Ironman while working on personal coding projects and exploring new technologies within software development. I was born and raised in Lund, but spent four years of my childhood in California, USA, making me essentially bilingual in Swedish and English.

Work Experience

Consultant, Netcompany, Copenhagen

June 2025 — Current

Working as a full-stack developer in a Scrum team on a project for the Danish Government. Responsible for delivering features end-to-end, from requirements analysis and solution design to implementation, testing, deployment, and maintenance. Regularly collaborate with clients and stakeholders through planning sessions, estimations, workshops, and customer meetings.

Technologies: C#, .NET, Angular, Python, Azure, Docker, Kubernetes, Azure DevOps, SonarQube

Master Thesis, Sinch, Malmö

January 2025 — June 2025

Conducted research on queuing systems for large-scale real-time communication platforms, evaluating the performance, scalability, and operational characteristics of technologies such as Kafka and RabbitMQ. The work focused on understanding how different messaging architectures affect throughput, latency, reliability, and operational complexity in distributed systems.

Technologies**:** Java, Scala, Kafka, RabbitMQ

Summer Internship, Ericsson, Lund

JUNE 2023 — AUGUST 2023**,** JUNE 2024 — AUGUST 2024

Completed two summer internships focusing on software quality, internal tooling, and codebase improvements. Worked in an agile Scrum environment with sprint planning, estimations, and cross-team collaboration.

Technologies**:** Python, C, Gerrit, Jenkins

Junior Software Developer, Axis Communications, Lund

September 2023 — MAY 2024

Worked with test automation and development of internal testing frameworks in an agile Scrum team. Participated in sprint planning, task estimation, and cross-team collaboration while contributing to improvements in software quality and development processes.

Summer Internship, Softhouse Sydväst AB, Malmö

JUNE 2022 — AUGUST 2022

Developed a backend tool that scraped and analyzed tweets from Swedish party leaders, categorizing them by topic, sentiment, and target audience, and displaying key metadata in a user interface.

Technologies**:** Python

Vice Industry Liaison D-sektionen LTH, Lund

JANUARY 2022 — DECEMBER 2022

As Vice Industry Liaison I acted as the link between students and the industry at LTH. My work consisted mainly of raising funds for the guild by organizing various company events and securing sponsors for our activities.

Alumni Board, Ungföretagsamhet.se, Malmö

AUGUST 2018 — AUGUST 2020

I was on the board of “Ung Företagsamhet Skåne”. Our task was to recruit young entrepreneurs to our network and organize various events for our current alumni. To achieve our goals, we worked with marketing, event planning and recruitment.

Education

Computer Science, LTH – Lund Faculty of Engineering, Lund

AUGUST 2020 — June 2025

Economics Program, Katedralskolan, Lund

AUGUST 2016 — JUNI 2019
